taking this to court

Hello, my name is Berry. I am here today to discuss what happened on June 4t , 7002. I was at home after a long day of work, minding my own buisness when I turned to the news channel and saw a wrecking ball outside my neighbors house.

I was confused and concerned so I rushed outside to stop what was happening. I soon found out that they were tearing down the neighborhood for the new research center. What is not right, is that they were making us move out and find a new living area all within one week.
